August 2022 – May 2026

- Cumulative GPA: 3.71/4.0; Economics Honors in Market Inefficiencies and Behavioural Biases
- Relevant coursework: Financial Economics, Econometrics, Linear Algebra, Probability and Statistics, Calculus III

PROFESSIONAL EXPERIENCE

Personetics

New York, NY

Business Analyst

June 2026 - Current

- Leading relationships with 5+ enterprise banking clients at a time, holding over \$200B in AUM at an AI-oriented FinTech firm
- Building Android and iOS app prototypes with the engineering team to test new product concepts and inform roadmap decisions
- Utilizing data analysis skills in SQL and Excel on financial data to debug bank data pipelines and develop new customer insights
- Improving cross-functional relationships between sales, engineering, and project management with expert product knowledge

Flowcode

New York, NY

Machine Learning Summer Analyst

June 2025 – August 2025

- Streamlined internal filing systems using Python and Bash, restructuring client-to-employee allocation and Excel spreadsheets
- Discovered insights via Looker and ZoomInfo to track 100+ sales leads monthly, providing actionable insights for revenue generation
- Helped automate NLP models, prototyping new context schemas to improve and validate accuracy in GTM and CS campaigns
- Built an ML model to analyze client behavior patterns, improving target precision by 40% and conversion rates by nearly 10%

Henry Labs

New York, NY

Product Manager

January 2025 – August 2025

- Pioneered automated trading bots as a side project, with focus on delta-hedging models in cryptocurrency-derivative markets
- Managed a PostgreSQL database with Redis to map client details across servers, optimizing savings and retrieval speed by 25%
- Guided A/B testing methodology with Google Analytics, Power BI, and BI platforms to improve SEO and client satisfaction
- Oversaw automated, virtual PCs through SSH and TMux, conserving operational overhead by \$1,000+ a month during testing

CIMB

Jakarta, Indonesia

Capital Markets Summer Analyst

June 2024 – Aug 2024

- Rotated in Forex, Fixed-Income, and Derivatives, mastering financial concepts like yield curve construction and bond duration
- Pitched new portfolio compositions to fund managers, hedging through mean variance and risk parity across mixed asset classes
- Automated private bank client CRMs in Excel using advanced filtering functions and VBA, conserving up to 10 hours per week
- Conducted equity research alongside fund managers and research analysts, catering and prototyping novel investment products

PROJECTS

NYU Biokind Analytics

New York, NY

Vice President

June 2025 – May 2026

- Led development of data analytics solutions for NY nonprofits as technical lead, saving \$10,000+ in outsourced consulting costs
- Conducted Machine Learning and PCA, improving marketing and fundraising efforts increasing donor rates by 10% a semester
- Tailored full-stack business intelligence apps in Python, SQL, and JS to clean, feature engineer, and surface curated insights

NYU Fed Challenge

New York, NY

Real Economy Analyst

May 2025 – October 2025

- Competed nationally among top colleges, formulating policy recommendations for the Federal Reserve based on data and theory
- Curated reports on GDP and monetary policy by applying econometric analysis, displaying data using Matplotlib and Seaborn
- Specialized in automated data retrieval pipelines, preprocessing macroeconomic indicators for building R* and inflation models
